Whitepaper of Ranghmarium Ecosystem

Entry

This document is the Whitepaper for the Ranghmarium Ecosystem project, an innovation ecosystem that brings together five digital assets: Ranghma (RANGHMA), Badma (BADMA), Narst (NARST), Akant (AKANT) and Eirene (EIRENE). The Ranghmarium Ecosystem is designed to create a versatile tool for fast and convenient operations both in-game and off-game.

The main purpose of the Ranghmarium Ecosystem

Ranghmarium Ecosystem coins have the following main features:

1. **Primary Currency** in PC Game: Ranghma acts as the primary currency in our PC game, where it allows players to make payments for in-game resources, upgrades, and trading.

2. **Purchase of Intangibles**: Unique Badma, Narst, Akant, and Eirene coins can also be used to purchase a variety of intangibles both in-game and off-game.

Ranghmarium Ecosystem Specifications

- Ecosystem name: Ranghmarium Ecosystem

- Total Ranghma: 50,000,000,000 RANGHMA

- Total Badma supply: 1 0 00 000 000 BADMA

- Total Narst: 500,000,000   NARST

- Total Akant: 100,000,000   AKANT

- Total supply of Eirene: 50,000,000 EIRENE

Using Ranghma in the Ranghmarium Ecosystem

Ranghma is the main currency for all Ranghmarium Ecosystem coins:

- Purchase of in-game resources, items, and in-game upgrades.

- Acquisition of intangible assets outside the game.

Decentralization and security

All Ranghmarium Ecosystem coins will be built on blockchain technology, which will ensure decentralization, security, and transparency of transactions. The system will ensure that all transactions are carried out in accordance with the terms and conditions defined in the smart contracts.

Ranghmarium Ecosystem Coin Review

The Ranghmarium Ecosystem brings together five unique digital assets, each with its own purpose and application in the ecosystem. The main Ranghma coin and the four minor coins - Badma, Narst, Akant and Eirene - are designed to provide flexibility, convenience and versatility in various fields.

Ranghma (RANGHMA)

- **Purpose**: The main Ranghma coin is intended for settlement between all participants in the project. It acts as a common currency for transactions in and out of the game.

- **Usage: Ranghma** is used to purchase in-game items, upgrades, and other resources in a PC game. It can also be used to purchase intangible assets and services outside of the game.

Badma (BADMA)

- **Purpose**: Badma is designed to pay for more expensive goods and services, both in-game and out-of-game. It helps to optimize payments for large and valuable assets.

- **Usage**: Players and users can use Badma to purchase a variety of goods, services, and digital content within the Ranghmarium ecosystem.

Narst (NARST)

- **Purpose**: Narst is used to pay for more expensive and valuable goods and services, allowing for greater flexibility in transactions.

- **Usage**: Narst holders can make payments for high-value goods, services provided in the Ranghmarium ecosystem.

Akant (AKANT)

- **Purpose**: Akant serves as a coin for settlements and storage as deposit funds. It contributes to the preservation and stability of digital assets.

- **Usage**: Players and users can use Akant to store digital assets or use it for settlements.

Eirene (EIRENE)

- **Purpose**: Eirene is a coin for settlements at the highest clan level, which allows players to maintain influence and reliably manage resources.

- **Usage**: Players can use Eirene to settle and jointly manage resources and other assets at the clan level.

Future prospects

We plan to gradually expand the Ranghmarium Ecosystem, including transferring it to our own blockchain and creating our own exchange. These steps will provide even more opportunities for convenient and fast operations for our users. The new Ranghmarium blockchain will pave the way for improvements in the efficiency, scalability, and reliability of our ecosystem.

The Ranghmarium Ecosystem is planned to be continuously improved, including the launch of its own blockchain and exchange. This will contribute to the growing popularity of the ecosystem and expand its capabilities.

Overview

The Ranghmarium Ecosystem is an innovative approach to digital assets that provides users with a wide range of options. Each coin in the ecosystem plays an important role in simplifying and improving settlements, ensuring financial stability, and expanding the scope of application.

Advantages Ranghmarium Ecosystem

1. **Versatility**: The Ranghmarium Ecosystem provides the ability to use digital assets for a variety of purposes, including in-game and off-game purchases, payments for goods and services, and storage of deposit funds.
2. **Flexibility**: Each coin has a specialized purpose, allowing them to be used conveniently and efficiently in a variety of situations.
3. **Scalability**: Future expansion plans, including its own blockchain and exchange, will allow for high scalability and speed of operations.

The purpose of each coin

1. **Ranghma (RANGHMA):** The main coin for settlements in all aspects of the project.

2. **Badma (BADMA):** Payments for expensive goods and services.

3. **Narst (NARST):** Settlements for valuable assets.

4. **Akant (AKANT):** The preservation and stability of digital assets.

5. **Eirene (EIRENE):** Clan-level calculations and resource management.

Questions & Answers

Q: *How can I purchase Ranghmarium Ecosystem coins?*

A: *Coins will be available for purchase on exchanges that support Ranghma and other coins in the ecosystem.*

Q: *Will the coins be able to be used in other projects?*

A: *At the moment, there are plans to support coins in the Ranghmarium ecosystem, but we are considering partnering with other projects.*

Q: *What are the advantages of Ranghmarium Ecosystem compared to other cryptocurrencies?*

A: *The Ranghmarium Ecosystem provides a wide range of coins with different uses, allowing them to be used flexibly in different areas. Future expansion plans will also allow for greater functionality and scalability.*

Q: *What are the functions of coin contracts to burn them?*

A: *All contracts of these coins have a built-in coin burn feature that allows users to intentionally reduce the total number of coins in circulation.*

Q: *What benefits can a user have from coin burning?*

A: *Coin burning is a way to help reduce the total number of coins in circulation, which can have a positive impact on the market price of the coin. In addition, in the future, users who burn coins may receive rewards in the form of other coins.*

Q: *How is the stability of the total number of coins in circulation ensured?*

A: **The total number of coins** *in circulation is ensured by automatically creating new coins after burning. This means that even after burning, the total number of coins always remains the same.*

Q: *How can a user get rewards for burning coins?*

A: **Users can get rewards for burning coins in the form of other coins.** *This means that for each certain number of coins burned, the user receives a reward in the form of other digital assets that can be used for further purposes.*

NFTs in the Ranghmarium Ecosystem

We also plan to introduce Non-Fungible Tokens (NFTs) technology into the Ranghmarium Ecosystem to empower our players and users. NFTs are unique digital assets that can be owned by players and investors, as well as exchanged on the virtual market.

Game Characters Collection

We create an NFT collection that includes unique characters from our game. Each character will have their own characteristics and skills, making them unique. Players will be able to own, trade, and collect.

Land plots and commercial buildings

In the game, players will be able to purchase land and commercial buildings in the form of NFTs. These properties can be used for a variety of purposes, from resource extraction to business activities. Players will be able to buy, sell, and trade these NFTs to expand their own ownership and entrepreneurial opportunities in the game.

Titles

We will also introduce a title system in the game where players can earn different recognitions and achievements. The titles will be presented as NFTs, and players will be able to display them on their profile, showcasing their status and achievements in the game.

In-game items

Finally, we will create NFTs for a variety of in-game items that players can collect, trade, and use. These can be rare or unique items that add variability and value to the gameplay.

Conclusion

The Ranghmarium Ecosystem is an innovative concept that brings together five unique digital assets, each with a specialized purpose in the ecosystem. By using Ranghma, Badma, Narst, Akant, and Eirene coins , we provide players and users with a high level of flexibility and options for convenient transactions both within and outside the game.

The future prospects of expanding the ecosystem, including our own blockchain and exchange, give us the opportunity to make the Ranghmarium Ecosystem an even more versatile and effective tool for our users.

Final Words

The Ranghmarium Ecosystem opens up new horizons for the use of digital assets in and out of the game. Each coin has its own purpose, allowing players and users to interact with the ecosystem with greater convenience and flexibility. We plan to actively develop the ecosystem, adding new features and capabilities to meet the needs of our users.

Thank you for your interest and support of the Ranghmarium Ecosystem!
